ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

WO 2004/017961 A3

(54) Title: DERIVATIVES OF 3-HYDROXY-4-(CYCLYL-ALKYLAMINOALKYL)-5-PHENYL-1H-PYRAZOLE AS ANTAG-  
ONISTS OF THE GONADOTROPIN RELEASING HORMONE (GNRH) FOR USE IN THE TREATMENT OF SEX HORMONE  
RELATED CONDITIONS, SUCH AS PROSTATIC OF UTERINE CANCER

(I)

(57) Abstract: The invention relates to a group of novel pyrazole compounds of Formula (I): wherein: R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, M and R<sup>5</sup> are  
as defined in the specification, which are useful as gonadotrophin releasing hormone antagonists. The invention also relates to  
pharmaceutical formulations of said compounds, methods of treatment using said compounds and to processes for the preparation  
of said compounds.

## INTERNATIONAL SEARCH REPORT

International Application No.  
PCT/GB 03/03633

A. CLASSIFICATION OF SUBJECT MATTER  
 IPC 7 A61K31/4155 A61K31/4439 A61K31/4196 A61K31/496 A61K31/5377

☒ Patent family members are listed in annex.

## \* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- \*Z\* document member of the same patent family

# INTERNATIONAL SEARCH REPORT

Intern application No.  
PCT/GB 03/03633

## Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claims Nos.: 1-16 (partly)  
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:  
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.  
☐ No protest accompanied the payment of additional search fees.

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 1-16 (partly)

The claimed compounds are widely known pharmaceutically active compounds.

The initial phase of the search revealed a very large number of documents relevant to the issue of novelty. So many documents were retrieved that it is impossible to determine which parts of the claims may be said to define subject-matter for which protection might legitimately be sought (Article 6 PCT).

For these reasons, a meaningful search over the whole breadth of the claims is impossible.

Consequently, the search has been restricted to a generic group defined by the structural features of the examples, i.e. to compounds wherein:

R2 is optionally substituted phenyl,

M is  $-(CH_2)_0-2-O-$  and

A is one of the options (i) to (iv) in claim 1

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
